

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_127684
Title of the Manuscript:	Effect of genotypes, fertilizer application & crop geometry on growth, yield and yield attributes in coriander (<i>Coriandrum sativum</i> L.)
Type of the Article	

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript is good effort that describe the nutrient management approach for the sustainable yield of coriander and have practical implications for coriander growers. But the article must be improved before final publication.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Is the manuscript scientifically, correct? Please write here.	Need improvement	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Need improvement	
Is the language/English quality of the article suitable for scholarly communications?	Need improvement 1. Introduction is very short. Elaborate it with some latest reference from well-reputed journals highlighting the significance of fertilizer and row spacing in improving yield of coriander. 2. Treatment, variety name and unit are not same trough tout the manuscript. Recheck it 3. Also elaborate the methodology. When fertilizers were applied. Time and method of application. They were applied as full dose or in splits. Source of fertilizers. Some physical and chemical properties of soil. Time of harvesting of crop. When data was recorded. Statistical analysis of data, software used for statistical analysis. Growth condition during study etc. 4. author must justify his statement with reference 5, Discussion is very poor it must be Improved with some latest references from well reputed journals. Justify your results with previous findings. Add some new references about significance and nutritional role of NPKS 6. What is message for farming community and future perspective 7. Please see the attached file	
Optional/General comments	Please see the attached file Recheck sequence of these treatments Cross check the references and arrange according to style of journals	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
