

Review Form 3

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_127807
Title of the Manuscript:	Needs Analysis in ESP Context for Yemeni Medical Students at Dhamar University
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The integration of ESP into medical education (in general) and Dhamar University Yemen (in particular) is vital for equipping students to overcome academic, clinical, and professional challenges. It not only enhances their personal and professional growth but also contributes to the overall development of Yemen's healthcare system.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article can be improved by making it specific, engaging, and reflective of the study's scope and focus. Alternative title-A Need Analysis Study of Yemeni Medical Students-An ESP Perspective	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No. The author needs to ensure the abstract reflects the interests and expectations of educators, policymakers, and researchers in ESP and medical education in Yemen.	
Is the manuscript scientifically, correct? Please write here.	To make the draft scientifically more correct, the author should focus on improving its accuracy, clarity, and adherence to established scientific writing conventions. Inclusion of quantitative or qualitative data to support the findings or arguments is required. Verification of the accuracy of statistics, terminology, and cited studies is missing. Tabulated data is missing in the study.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The reference list can be improved. The author needs to ensure that each significant claim or concept is backed by at least one reliable source.	
Is the language/English quality of the article suitable for scholarly communications?	The language of the article must align with the expectations of the target academic audience. Scholars, researchers, and practitioners require precise explanations of complex ideas.	
Optional/General comments	A need analysis study in the ESP context for medical students is a critical step in designing effective language programs that address their academic and professional requirements. Medical students often face challenges in understanding medical texts as English is the primary language of medical literature and international collaboration. A thorough needs analysis helps identify specific linguistic skills, such as reading comprehension of medical journals, writing case reports, and verbal communication in clinical set ups, which is paramount for their success. The study considers the unique cultural, educational, and institutional context, such as the challenges faced in regions like Yemen, to develop tailored ESP courses. Conducting such an analysis ensures that the curriculum is relevant, focused, and aligned with the students' future roles as healthcare professionals, ultimately contributing to their academic success and professional competence. However, it is observed that the author needs to provide an improved presentation of quantitative data backed by qualitative analysis.
