Type of the Article	Research

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript addresses a critical yet underexplored area of research comprehensive sex education for youth living with disabilities in Botswana. It highlights the challenges faced by parents/guardians and provides actionable strategies to address these issues. Given the growing need for inclusivity in education and social policies, this work provides valuable insights for practitioners, educators, and policymakers. Moreover, it contributes to advancing the discourse on the intersection of disability, sexuality, and education.	
Is the title of the article suitable? (If not please suggest an alternative title)	he title is precise and aligns well with the manuscript's content. It captures the scope of the study effectively. No changes are suggested.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is clear and well-structured, summarizing the objectives, methods, key findings, and implications. However, it could briefly include the number of participants and the sampling methodology to provide a complete snapshot of the study.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically robust. The methodology is clearly explained, and the thematic analysis is appropriate for the research questions. The findings are well-supported by data, and the discussion integrates existing literature effectively.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and mostly recent. However, adding more references from studies conducted in Sub-Saharan Africa would strengthen the regional context.	
Is the language/English quality of the article suitable for scholarly communications?	The language is generally suitable for scholarly communication. Some minor grammatical corrections and improvements in phrasing could enhance readability and precision.	
<u>Optional/General</u> comments	The study could benefit from further elaboration on the implications for policy and practice, particularly how the findings can inform national strategies for inclusive education and disability rights in Botswana.
