

## Review Form 1.7

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_119296
Title of the Manuscript:	Comparison of Intravenous and Topical Injection Administration Mesenchymal Stem Cell Secretome to Restrain Gastrointestinal Anastomosis Leakage: A Review
Type of the Article	Review Article

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>1. Yes, this topic is of significant interest to the scientific community. It has practical implications and potential applications. Furthermore, ongoing research in this area has the potential to lead to groundbreaking discoveries and advancements in various fields. Scientists are continuously exploring new avenues to expand our understanding and harness the full potential of this topic.</p> <p>2. This article title compares Intravenous and Topical Injection Administration of Mesenchyme Stem Cell Secretome to prevent Gastrointestinal Anastomosis Leakage, aimed at raising awareness in every community. In this study, we will delve into the benefits and drawbacks of both intravenous and topical injection administration of mesenchymal stem cell secretome in preventing gastrointestinal anastomosis leakage. By comparing these two methods, we hope to provide valuable insights for healthcare practitioners and researchers looking to improve outcomes for patients undergoing gastrointestinal surgery. Join us as we explore the promising potential of stem cell therapy in the context of gastrointestinal health.</p> <p>Yes, abstract of the article is comprehensive. Great! The abstract effectively summarizes the key points of the article and provides a clear overview of the research findings. I look forward to delving into the full article to gain a deeper understanding of the topic.</p> <p>Yes, the subsections and structure of the manuscript are appropriate. Thank you for your attention to detail and organization throughout the manuscript. Your effort in clearly defining the subsections and structure has greatly enhanced the readability and coherence of the document.</p> <p>Yes, the manuscript is scientifically accurate.'</p> <p>Yes, the references are adequate. No suggestions. Great! It looks like the research is thorough and well-supported. Keep up the good work!</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes, the language quality of the article is suitable for scholarly communication .The content is well-researched, organized, and presented in a clear and concise manner, making it suitable for academic and professional audiences.</p>	
<p><b>Optional/General</b> comments</p>	<p>This article is excellent. The researcher presents very good material for raising awareness about this topic. It is definitely worth using. I found the information to be clear and concise, making it easy to understand even for those new to the subject. I highly recommend reading this article to gain valuable insights into the topic at hand.</p>
