

### Review Form 3

Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_129164
Title of the Manuscript:	<b>A Trial for Enhancing Tribal Farmers' Incomes through Value Addition in Green Peas by Drying Under Fluidized Bed Drying</b>
Type of the Article	

#### **General guidelines for the Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

#### **Important Policies Regarding Peer Review**

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

### Review Form 3

#### PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	This manuscript is of significant importance to the scientific community as it provides experimental data on the drying of green peas. The study shows that blanching green peas at 85°C for 1 minute, followed by fluidized bed drying at a bed height of 40 mm and a drying air temperature of 55°C, results in high-quality dried peas with excellent qualities. The article emphasizes the benefits of fluidized bed drying, which may help farmers increase their income from pea production. The study provides valuable data on green peas with improved quality for long-term storage. The proposed management strategies, including enhanced value addition and related recommendations, offer valuable guidelines for researchers and farmers, not only in Gujarat but across various states. Moreover, the insights presented in this article have the potential to boost farmers' incomes, ensure food security, and improve livelihoods.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>No</b> , this title may be revised as the article is based on the experiment. An indicative title might be <b>"Value Addition in Green Peas by Drying Under Fluidized Bed Drying method"</b> An alternative title could also be: <b>Value Addition of Green Peas Through Fluidized Bed Drying"</b> This emphasizes the article/research paper aspect while highlighting the focus on impacts the data.	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	Minor corrections are required in the abstract as suggested. The abstract includes unnecessary details such as extensive data and introductory information that are not essential. It should be concise and clear, focusing on presenting the key findings and facts of the manuscript to ensure readers can easily understand its core message.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	Improvements are needed based on the comments provided in the manuscript, which the authors are encouraged to incorporate.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The references provided are outdated and insufficient, requiring additional and more recent sources to better support the claims.	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	Satisfactory, required some improvement in manuscript.	
<b>Optional/General</b> comments	The author should incorporate additional data-driven references, specifically addressing pea production both globally and in India. The manuscript does not include any discussion or statements focusing on improving the income or economy of tribal farmers, which is necessary to provide a stronger foundation for the article and make it more relevant to the target audience of researchers. As the experiment was conducted on a research farm and does not directly involve farmers, the title should be simplified, removing any reference to tribal farmers' income.	

#### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
