

Review Form 3

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_128509
Title of the Manuscript:	PERCEIVED-RISK AND PROTECTIVE FACTORS IN SUICIDAL IDEATION AND ATTEMPT AMONG STUDENTS IN THE FEDERAL POLYTECHNIC OFFA KWARA STATE NIGERIA
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is important for the scientific community as it explores the critical issue of suicidal ideation and attempts among students, a vulnerable people. By examining perceived risk and protective factors in a Nigerian educational context, it provides valuable insights into culturally specific contributors to suicide. The findings can inform targeted mental health interventions and policies, fostering resilience and reducing suicide risks among students.	
Is the title of the article suitable? (If not please suggest an alternative title)	I think you can simply use "suicidal behavior" instead of "suicidal ideation and attempts." Perceived Risk and Protective Factors in Suicidal Behavior Among Students at Federal Polytechnic Offa, Nigeria.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	If possible, it would be better to include which protective factors (include the %) contributed to reducing suicidal ideation in the abstract's results section, as it currently mentions only the risk factors.	
Is the manuscript scientifically, correct? Please write here.	Looks great. I was particularly more curious about the percentage of individuals with suicidal ideation alone, the percentage with suicidal ideation and a plan, the percentage who gathered means, and the percentage who attempted suicide. It would be better to include the suicide rates of Kwara State and Nigeria as a whole in the introduction section.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Please visit this page for better understanding. https://zerosuicide.edc.org/	
Is the language/English quality of the article suitable for scholarly communications?	To avoid repetition, here are some rephrasing and synonyms for "Suicidal Ideation" and "Suicidal Attempt" Suicide Thoughts instead of Suicidal Ideation Suicide Planning or Intent to Die instead of Suicidal Ideation with Plan Means Acquisition for Suicide or Gathering Suicide Methods instead of Collection of Means Suicide Attempts can be replaced with Self-harm Attempts, Life-threatening Behaviors, or Suicidal Acts	
Optional/General comments	Good keep continue
