Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This study maybe helpful in adding knowledge regarding the most common bacterial infection among Iraqi patients suffering from cholecystitis in AL-Anbar province . However, the manuscript, in its current form is not refined enough to add significant value to the scientific knowledge related to the said matter.	
Is the title of the article suitable? (If not please suggest an alternative title)	In my opinion, the title is not suitable. Suggestive title can be: The most common bacterial infection among Iraqi patients suffering from cholecystitis in AL-Anbar province - a cross-sectional observational study.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive	
Is the manuscript scientifically, correct? Please write here.	Although the article is technically sound, the manuscript can be more descriptive in terms of it's findings. The methodology section lacks the mention of the exclusion criteria and the discussion section can be more elaborate. In brief, the manuscript is superficial as far as it's scientific knowledge is concerned.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some are recent references. However, references from past 4-5 years may be helpful.	
Is the language/English quality of the article suitable for scholarly communications?	Yes
