

Review Form 3

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_129061
Title of the Manuscript:	Prevalence of Primary Cutaneous Lymphomas: A Cross-Sectional Study Using SEER Database in the United States
Type of the Article	Letter To The Editor

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	<ol style="list-style-type: none"> 1. Importance of this manuscript is moderate/ average. 2. It would be better if the author had calculated prevalence of CL among the cases of lymphoma 3. Prevalence of CL 0.0000007% looks like imaginary number and the policy makers might ignore this number so calculation should be revised to bring that in light 4. It would be better if the author mentioned the year of SEER database update e. g. 2018 5. This topic is attractive for dermatologists, oncologists and Hematologists 	
Is the title of the article suitable? (If not please suggest an alternative title)	I like to propose the title as "Prevalence of Primary Cutaneous Lymphomas in the United States: A Cross-Sectional Study Using SEER Database up to 2018"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<ol style="list-style-type: none"> 1. In second line "are a subtype of leukemia" could be deleted. 2. "A cross sectional study was conducted on the basis of SEER database 2018"... a sentence can be added 3. Line 6, "The White race had the highest prevalence rate compared to other racial groups." This line could be omitted from abstract/ it can be replaced by any relevant sentence 	
Is the manuscript scientifically, correct? Please write here.	<p>"The SEER database had 43,926,825 participants in 2018" I think that figure need more clarification and the prevalence rate 0.0000007% needs recalculation</p> <p>Otherwise this manuscript is ok</p>	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	<p>Yes</p> <p>Another reference could be added Cai ZR, Chen ML, Weinstock MA, Kim YH, Novoa RA, Linos E. Incidence Trends of Primary Cutaneous T-Cell Lymphoma in the US From 2000 to 2018: A SEER Population Data Analysis. JAMA Oncol. 2022 Nov 1;8(11):1690-1692. doi: 10.1001/jamaoncol.2022.3236. PMID: 36048455; PMCID: PMC9437821.</p>	
Is the language/English quality of the article suitable for scholarly communications?	"Our analysis has limitation" can be changed as there are some limitation	
<u>Optional/General</u> comments		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
