EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>The reviewers requested that the paper be reorganized and rewritten. Most of the complaints were about the material and work methods.</p>	<p><b>Done</b></p>
<p>The authors made only a cosmetic procedure and divided the same text and wrote it out under a specific paragraph and subtitle.</p>	<p><b>Done</b></p>
<p>They did not fully respect the remarks of the reviewers or explain why.</p>	
<p>References related to the applied methods are still missing (for example, the procedures for determining individual bacterial species are missing - either they should be referred to published research or the method used should be written).</p>	<p><b>Done</b></p>

<p>I am of the opinion that the authors should improve their work</p>	<p>Done</p>
