### Review Form 3

#### PART 1: Comments

|  | Reviewer's comment   | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|--|--|---|
| Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part. | I appreciate the efforts put by the authors in writing this manuscript this manuscript is the need of an hour as amoxicillin and clavulanic acid and all the other medications mentioned in the manuscript are the most commonly used medications in pediatric population. This is an eye opener cautioning regarding the rational usage of these medication emphasising on their ability to cause severe skin disorders simultaneously focusing on the secondary infections, respiratory distress associated with SJS TEN. This would be a valuable paper to the scientific community as it focuses on the potential adverse drug reaction caused by the commonly used cough syrups. This paper explains how treat such complicated cases can be handled in pediatric patients with limited resources.  |   |
| Is the title of the article suitable?<br>(If not please suggest an alternative title)  | The title is suitable.   |   |
| Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.      | Yes, it is comprehensive.  |   |
| Is the manuscript scientifically, correct? Please write here.  | Yes, the manuscript is scientifically correct.   |   |
| Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.                              | Yes, all the references are the recent ones except the first reference, try to change the reference number 1 as it is from 1993 a recent alternative can be added.<br>All the references are in the similar formatting except the 12 <sup>th</sup> reference, kindly change the formatting of 12 <sup>th</sup> reference.  |   |
| Is the language/English quality of the article suitable for scholarly communications?  | Yes, it is suitable for scholarly communications.  |   |
| <u>Optional/General</u> comments   | <ol style="list-style-type: none"> <li>I recommend to add the discharge medications prescribed as the child did not heal completely and the condition is still persistent in genital and anal areas.</li> <li>Is liver cytolysis associated with the administration of the cough syrup if yes it would be even more meaningful to add on a point in discussion section stating the pathophysiology behind it.</li> <li>In evolution of 2<sup>nd</sup> child It would be even more appropriate if the name of the medications are mentioned.</li> <li>In discussion section 3.3 bottom 5<sup>th</sup> line If there is any other standard medication that author would recommend to treat the condition in pediatric population can also be included.</li> <li>Try to avoid using a reference citation in conclusion section if possible.</li> <li>Try to use Vancouver referencing format or NLM as they are commonly used in scientific paper writing.</li> </ol> |   |

#### PART 2:

|   | Reviewer's comment   | Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|--|--|
| <u>Are there ethical issues in this manuscript?</u> | <i>(If yes, Kindly please write down the ethical issues here in details)</i> |  |
