

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_128039
Title of the Manuscript:	Effects of rationing rate on growth and survival of Sarotherodon melanotheron larvae reared in happas at Layo Experimental Aquaculture Station (Côte d'Ivoire)
Type of the Article	

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Benefits for Reviewers: <https://r1-reviewerhub.org/benefits-for-reviewers>

Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Assessment of fish growth requires the use of approaches such as size structure method, condition factor and weight-length relationship. The varieties and quality of food resources can affect fish growth. The external environment and confinement of fish have an impact on the growth process in fish. The quality of the fish's living environment also influences fish growth. Likewise, several other factors such as seasons, age, sex and physiological state can influence fish growth. Therefore the work carried out in this manuscript is important and relevant in order to understand the impact of the rations administered to the Melanotheron sarotherodon larvae studied on their growth and survival at the Layo aquaculture experimental station in Ivory Coast.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the manuscript is not very appropriate. We propose the following title: Impact of rationing on growth parameters (length-weight) and survival of Melanotheron sarotherodon larvae at the Layo aquaculture experimental station in Ivory Coast	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the manuscript is not complete because the general objective and specific objectives of the research carried out are not found in the abstract. Recommendation : The author of the manuscript must complete the summary with the general objective and specific objectives of the research	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically correct	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Sufficient and recent references but it is necessary to remove reference No 17 which is from 2002 and therefore 22 years old	
Is the language/English quality of the article suitable for scholarly communications?	The quality of English used in this manuscript is appropriate	
<u>Optional/General</u> comments	To improve the scientific quality of the manuscript, the author must complete: - Physicochemical parameters with suspended solids (MES), Biochemical Oxygen Demand 5 (BOD5) and Chemical Oxygen Demand (COD) - Improve the Discussion - Add a photo of the Melanotheron sarotherodon larvae which were the subject of this study - better structuring of the conclusion	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
