

Review Form 3

Journal Name:	Asian Journal of Economics, Business and Accounting
Manuscript Number:	Ms_AJEBA_128657
Title of the Manuscript:	Factors affecting the income of rural households in the Midlands and the Northern Mountains, Vietnam: Evidence from quantile regression
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study is important for the following reasons: <ul style="list-style-type: none"> - no quantile regression studies have been conducted in Vietnam - is carried out for a large geographic area where low income predominates 	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	When considering the age variable in the model, this variable must be included in the summary because it is part of a Mincerian model.	
Is the manuscript scientifically, correct? Please write here.	Yes, for the following reasons: <ul style="list-style-type: none"> - It is considered a clear objective - It is based on previous studies or literature on the topic - Two models are defined - Results and conclusions are presented - This study gives results similar to other research results 	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The author could include references to some variables used in the models to give more support to them, for example, studies that consider: <ul style="list-style-type: none"> - Land area tied to credit - The dependency rate and the status of being married (marriage) I could suggest some studies but they are in Spanish, carried out in Latin America	
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	It is necessary to clarify the use of dummy variables to define the structure of the home It is important to take into consideration the results of the tests carried out: model suitability, multicollinearity, error variance, autocorrelation
