Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	In Optional/General comments	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	<p>The study is generally good and reports interesting results. Some suggestions for improvement are made.</p> <p>It is better to mention the year of the study in the title.</p> <p>In the abstract section:</p> <p>In the method section, the reliability and validity of the questionnaire should be mentioned.</p> <p>In the results section:</p> <p>First, the demographic variables should be mentioned in detail and the analysis should be thanked.</p> <p>In the keywords section, it is better to add the keyword mothers.</p> <p>Introduction section:</p> <p>It is very brief. Please expand it, refer to previous statistics, refer to the results of similar studies, and then mention the study gap and address the importance and necessity of the work.</p>	

Review Form 3

	<p>Method section: Regarding the inclusion and exclusion criteria, it is better to consider other items, for example, infant feeding problems such as cleft palate or maternal problems such as breastfeeding problems or infections, etc. More details need to be mentioned regarding the design of the instrument, including validity, reliability, and reliability.</p> <p>Results section: The results are reported well. The number of tables is large, they should be merged if possible.</p> <p>Discussion section: It is better to clarify the explanation and justification of the results, for example, regarding the type of delivery and multiparous mothers, the receipt of anesthesia. The strengths and weaknesses of the study, the limitations of the study, the application of the results in breastfeeding policy-making and future studies should be mentioned.</p> <p>References: Some references are incomplete and some are old, please update.</p>
