Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the dynamic relationship between the prices of major cereals in the Northern Region of Ghana, a key area for agricultural production in the country. Understanding these price dynamics is crucial for policymakers, economists, and agricultural stakeholders, as it can inform decisions on food security, market regulation, and rural development strategies. By analyzing price fluctuations and their interconnections, the study contributes to a better understanding of market behavior, supply chain efficiency, and the socio-economic impacts on farming communities. This research is particularly important in the context of climate change, population growth, and fluctuating global food markets, offering a foundation for evidence-based interventions to stabilize prices and enhance food security in the region.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, because it more likely a comparative research.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No. The Author need to include the broad objective of the research (as the first sentence), the method of data collection, conclusion and recommendation. This is because abstract is a mirror of any research, it should include all the segment of the research.	
Is the manuscript scientifically, correct? Please write here.	Yes, because it follows the traditional arrangement of manuscript for all journal. But to enrich the work more, on the segment of material and methods, the Author should describe the study area and justify the need to carry out the research there. Also, the results and Discussion segment, The findings needs to be supported/disagreed with the work of other. This is possible is there is a segment for empirical review or if the author has already did that on the main work. The implication of every results discussed should be state immediately the major findings is presented.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No, more literatures has to be reviewed to make the introduction more explainable. On the reference segment, align all the references to follow single format.	
Is the language/English quality of the article suitable for scholarly communications?	Yes. It is Results and Discussion not 'Results and Discussions'.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
