Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Authors present a rather common location of a GIST tumor Tumor proximity to the jejuno duodenal junction poses some challenges concerning surgical management which are not thoroughly discussed The tumor was rather benign Nevertheless it mandated use of imatinib since no GIST is ever benign in the end. This rather common appearance of a GIST is a good opportunity to discuss medical literature concerning those tumors which are more or less rather infrequent in everyday practice	
Is the title of the article suitable? (If not please suggest an alternative title)	Authors could add “ and discussion of the literature “ after their title since this is the main point of the case report	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Authors should provide more details about their case and reduce the size of introduction For instance they should mention giving imatinib or that the operation was uneventful	
Is the manuscript scientifically, correct? Please write here.	The document looks like more like a notes The text should be organized Authors should discuss the severity of bleeding episodes and why it took them so long to diagnose the lesion Were all five episodes presented with melena Why they characterize it a low GI bleeding? Moreover they should discuss the characteristics in CT scan made them to proceed in the operation and not performing an upper endoscopy with a colonoscope if double balloon enteroscopy was not available to take biopsies They should also explain why they havenot proceeded to perform a PET scan to exclude metastatic disease. Had the patient any commorbidities that affected his handling	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form	Inoue A, et al. Gastrointestinal stromal tumors: a comprehensive radiological review Japanese J Radiology 2022;40:1105-20 Lee CM, et al. Gastrointestinal stromal tumor: Computed tomographic features WJ Gastroenterol 2004;10 : 2417-8 Townsend H. Surgical Management of Gastrointestinal Stromal Tumors J Adv Pract Oncol 2023;14:541–547.	
Is the language/English quality of the article suitable for scholarly communications?	Language is acceptable, but a final judgement would follow when authors present a real document	
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
