Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Exploring the habit of denture wearing in a sample of the Lebanese population is crucial for understanding the prevalence and impact of oral health issues in the region. This research can shed light on the reasons behind tooth loss, the socio-economic factors influencing denture use, and the psychological effects on individuals. By analyzing the pattern of denture wear, targeted public health initiatives and improvement in access to dental care are more likely to reach older adults or low-income groups. Additionally, it can help create an environment with adequate awareness concerning proper maintenance of dentures and its role in enhancing quality of life.
