

Editor's Comment:

The authors have a comprehensive revision and have fully responded to all the reviewer comments. I am satisfied that they have responded to all the concerns raised, especially by reviewer sab who requested several corrections.

The study is well aligned with the Journal of Experimental Agriculture International Scope and aspirations and is publishable in the journal. The authors should make a final revision to correct any minor grammatical and typographical errors before its publication.

Decision:

The paper should be published in the journal of Experimental Agriculture International.
