| <p>Classification of skin tumours is totally wrong.. viral warts, keloids, molluscum, sebaceous cyst, seborrhoeic keratosis doesn't come under cater gory of skin Tumors.. the study needs to be repeated again.. keloid is not a tumour at all.. and they have given keloid as the most common tumour which is totally not correct.. kindly rewrite the Manuscript and change the classification of skin</p> | <p>My classification of skin tumours is based on that of the World Health Organisation classification. The lesions you mentioned are classified as benign skin tumours.Here is my reference - LeBoit P.E, Burg G, Weedon D, Sarasin A, editors. World Health Organization Classification of Tumors. WHO Pathology and Genetics of Skin Tumors. Lyon: IARC Press, 2006: 9-11.</p> |
