

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_129457
Title of the Manuscript:	Effect of different transplanting times on growth and yield of lettuce variety Great Lakes
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript discusses a good subject matter, providing information on different planting times for lettuce in India. It helps farmers select the best time to plant the crops and, at the same time, provides information about the effect of temperature on plant growth. Despite the subject matter having been researched in many countries, it is considered new to the region.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is appealing and attracts readers to read the manuscript.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract discusses all elements presented in the manuscript. However, my comments are as follows: <ol style="list-style-type: none"> 1. The title stated different transplanting times, which represent different temperatures in that area. It is good to mention the temperature during the specified time. 2. The title stated the different transplanting times, but the second row of the abstract mentions the different sowing conditions. Are they the same or different perspectives? Please write in whole words or phrases such as DAP, RBD, and RDN. Used the abbreviation after the full word or phrase were written in the manuscript. 	
Is the manuscript scientifically, correct? Please write here.	Despite being very short, the manuscript was written beautifully. Very easy to understand, and I enjoyed reading it.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The authors cited quite a number of previous studies. It is good to review studies that discuss the effect of temperature on the growth and yield of lettuce.	
Is the language/English quality of the article suitable for scholarly communications?	Good	
<u>Optional/General</u> comments	To my knowledge, no ethical issues was found. As my suggestion, it is better to add the temperature during the specified time and discuss if there is a significant difference in the plant growth and yield.
