Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The topic is old and the manuscript has been made more complicated by introducing so many criteria and statistical tests. Honestly, I lost my interest halfway through. The material and methods are too long and complex and the outcome / results inferred are already known. It gives a feeling of approaching an easy topic through a complicated route. The data collection was done ages ago 2007? More than a decade. And the comparison has been done with recent studies.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title should be rephrased, revisited to make it appealing and interesting.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is ok.	
Is the manuscript scientifically, correct? Please write here.	It is ok.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are acceptable	
Is the language/English quality of the article suitable for scholarly communications?	It is ok.	
<u>Optional/General</u> comments	One reader being a reviewer found it having too much information and dense analysis, how do you expect a regular reader to go through it. All anyone will care about is positive association reported. That's entirely my point of view.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Are there ethical issues in this manuscript?</u>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
