**PART 1: Comments**

|   | <b>Reviewer's comment</b>   | <b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|---|--|
| <b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b> | Such rare case presentations are very important in clinical practice. Its very important to take follow up of such patients and make clinicians aware on such presentation and differential diagnosis |  |
| <b>Is the title of the article suitable? (If not please suggest an alternative title)</b>   | Its not unexpected. Any patient with known AF is vulnerable to embolic stroke and any altered sensorium patient can have stroke. The diagnosis may be not so common bur presentation s very common.   |  |
| <b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>      | Absract is upto the mark. it covers all the points of the article.so no changes are suggested.  |  |
| <b>Is the manuscript scientifically, correct? Please write here.</b>  | Yes. its correct. we are not going in details of criticism of management as per protocol.Whatever was done is presented well and in chronological order   |  |
| <b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>                              | Yes. references are published in duration of nearly 1999 to 2014. that is sufficient enough to support the literature   |  |
| <b>Is the language/English quality of the article suitable for scholarly communications?</b>  | Fe spelling mistakes are there like militus, infarcted. however its minor and easily rectified  |  |
| <b>Optional/General</b> comments  | case article is good and rare so it is publishable in the journal.  |  |

**PART 2:**
