

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Research and Reports in Endocrinology</a>
Manuscript Number:	Ms_AJRRE_128345
Title of the Manuscript:	Effect of Toothpaste Sweeteners on Glucose Homeostasis
Type of the Article	Research article

#### **PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	<b>This research provides a good insight into the side effects of brushing. Even though it is healthy to brush before or after a meal, it provides a very good educative study on side effects, particularly on glucose levels. This will serve as a medium to sensitize both layman and the learned to be aware of the danger of daily brushing. It will also serve as an avenue to open further research questions to researchers.</b>	
Is the title of the article suitable? (If not please suggest an alternative title)	<b>It sounds great with the work</b>	

**Review Form 3**

<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>-Introduction should be written separate from the objectives          -the headings on the abstract should start on different lines. Please do not join all together in a paragraph          -high-brix toothpaste not toothpastes if you want to write as plural please try and rephrase it to like 'high-brix kinds of toothpaste (singular)          -aged 18 to 25 years. Please indicate the gender. Are you using mixed or a specific gender for the study? It is important to indicate this in the abstract.          -what do you mean by p= 0.5277 and p= 0.8796? It is not clear. Maybe you meant probability level, but is it two?          -change toothpastes in keyword to singular</p>	
<p><b>Is the manuscript scientifically, correct? Please write here.</b></p>	<p><b>Introduction</b>          - 'Oral mucosa' and 'Sweeteners': you don't need to have this heading in a research article.          - Do you mean glucosylceramides? Please confirm          - "Certain products, such as benzyl alcohol found in toothpaste" you need a citation for this.          - 'HFCS is much sweeter than sucrose and is primarily used in soft drinks and processed foods.' You need to cite this. Please take note of most statements in the introduction, most of them lack citations, especially the second to the last paragraph.</p> <p><b>Materials and methods</b>          -On sample size, please indicate what gender you use.          - "The study included various commercial toothpaste brands" include something like as indicated in Table 1          -Under elimination criteria, please add a few statements on why you selected some set of people and left some.</p> <p><b>Results</b>          -"at the facilities of the Centro Mexicano en Estomatología, Morelia campus." Please include date          -"Xylitol and stevia were used less frequently. Table 1." I don't know why you have 'Table 1' written after the statement.          -Please use the appropriate table style. This is not quite presentable. Please put the table caption on top of the table and not below.          -"50 participants (20 women and 30 men) aged 18 to 25 years were recruited" recruited! Please find a better word for this.          -You don't have to bold some parts in your text, please remove that.          -'glucose levels tended to decrease over time' tended to decrease. Please rephrase          -'86.3 mg/dL. Table 2.' Remove Table 2 as a word, use the appropriate table type, and ensure you put the table caption on top.          -You don't have to repeat all units in the table. Just have it written on top of the column for the respective column and you are good.          -Table 2 caption doesn't make sense. It looks like you were explaining the result on the caption.          -In Table 3, 'Arm &amp; Hammer Truly Radiont' you meant radiant or what? Try and rephrase the caption for Table 3. Be concise!</p>	

**Review Form 3**

	<p>-Results now having two different subheadings rather name the second one as 'Data analysis'</p> <p>-Ensure you remove all the bold words.</p> <p>-Figure 1. Ensure you have a label on the y-axis and please write a concise title for Figure 1.</p> <p>Discussion</p> <p>'To date, no articles have been published in' published on</p> <p>-paragraph 2, relate their work to your study</p> <p>-On a general note, relate those people you mentioned in the discussion work to your study. Even though they are not the same as yours, there could be some part of the research that somehow aligns. That's what discussion is all about.</p> <p>Conclusion</p> <p>-Make the conclusion to be a paragraph. Do not separate them.</p> <p>References</p> <p>-Please use the same reference style as recommended by the journal throughout. I can see some have doi while some don't.</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>	<p>References are not sufficient. There is little more to be added</p>	
<p><b>Is the language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes</p>	
<p><b>Optional/General</b> comments</p>	<p><b>NILL</b></p>	

**PART 2:**

	<p><b>Reviewer's comment</b></p>	<p><b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes. Kindly please write down the ethical issues here in details)</i></p>
