

Review Form 3

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_129581
Title of the Manuscript:	Diversity of Avifauna in the campus of Navsari Agricultural University, Navsari, Gujarat, India
Type of the Article	Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into biodiversity conservation within educational institutions. It highlights the significance of university campuses as critical green spaces that support avian diversity, even in urbanized areas. The study's long-term observational approach and detailed checklist of bird species make it a significant contribution to urban ecology and conservation science.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable and accurately reflects the content of the manuscript. No modifications are required.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive and effectively summarizes the study. However, including specific quantitative results, such as the number of species recorded or significant findings, would enhance clarity and provide a stronger overview.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically robust. However, some of the IUCN statuses provided in the bird checklist are outdated. These should be updated by cross-referencing with the latest IUCN Red List (2024). Additionally, minor elaboration on the methodology, such as sampling effort and limitations, could be beneficial.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references cited are relevant and sufficient. Including a few recent studies on urban biodiversity and the ecological role of institutional green spaces could further strengthen the discussion.	
Is the language/English quality of the article suitable for scholarly communications?	The language is clear and suitable for scholarly communication. Minor grammatical improvements in the introduction and discussion sections would enhance readability and flow.	
<u>Optional/General</u> comments	This study is a valuable resource for understanding avian diversity in institutional campuses and urban green spaces. Future research could compare biodiversity patterns in other similar campuses or urban habitats to provide a broader ecological context. The inclusion of conservation recommendations is a strong point of this study.
