#### PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	This manuscript is of significant importance to the scientific community as it addresses a rapidly evolving and highly relevant topic— the integration of Artificial Intelligence (AI) in corporate finance, specifically for startups. The systematic review offers a comprehensive exploration of how AI can revolutionize financial strategies, decision-making, and automation in early-stage companies, an area that has not been extensively studied in the existing literature. By identifying key opportunities and challenges, this work provides valuable insights for researchers, practitioners, and policymakers looking to understand the transformative potential of AI in financial management. Moreover, it contributes to the growing body of knowledge on AI's role in enhancing financial forecasting, risk management, and process efficiency, making it a critical resource for future research in both AI and finance fields.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title of the article, " <b>Artificial Intelligence in Corporate Finance - Transforming Financial Strategies for Startups: A Systematic Review</b> ," is generally suitable as it clearly reflects the focus on AI's impact on corporate finance with a specific emphasis on startups.	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	I suggest the following revisions: <b>Clarification of Scope:</b> While the abstract mentions "50 peer-reviewed articles," it could briefly clarify the criteria for article selection or provide a note on the diversity of sources (e.g., case studies, industry reports). This would give readers insight into the breadth and reliability of the sources analyzed. <b>Highlighting Research Gaps:</b> The abstract touches on research gaps, which is a crucial aspect, but it could be more specific about the particular gaps identified (e.g., scalability of AI tools, ethical frameworks). This would offer a clearer picture of the novel contributions of the study.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	The scientific content is good	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The references in the manuscript appear to be comprehensive, drawing from key works in the field of AI applications in corporate finance, particularly focusing on startups. But I suggest the references below too ;  Akintayo, T. A., Paul, C., Queenet, M. C., Nnadike, O. A., Victoria, S. S., David, F. B., ... & Olayinka, U. W. (2024).
