

Review Form 3

Journal Name:	Asian Journal of Cardiology Research
Manuscript Number:	Ms_AJCR_128998
Title of the Manuscript:	Ventricular tachycardia on hemochromatosis in a young subject: about a case.
Type of the Article	Case report

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The current article highlights the serious cardiac complications of hemochromatosis and the importance of cardiac follow up for hemochromatosis patients	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes it is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The author could write more details about the pathogenesis of hemochromatosis as this part is lacking Also nothing was mentioned about the possibility to use iron chelators especially Deferriprone (L1) as a treatment modality as it is known to be effective especially in cases of cardiac iron deposition . why it was not added to the patient treatment	
Is the manuscript scientifically, correct? Please write here.	Yes please add some explanation about the pathogenesis of hemochromatosis. And iron chelators as a treatment modality especially Deferriprone (L1) known for its predilection for cardiac iron deposition	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are needed for pathogenesis of hemochromatosis and for iron chelators part after their addition to the case report	
Is the language/English quality of the article suitable for scholarly communications?	Yes suitable	
<u>Optional/General</u> comments	The current article highlights the serious cardiac complications of hemochromatosis and the importance of cardiac follow up for hemochromatosis patients The author could write more details about the pathogenesis of hemochromatosis as this part is lacking and the role of iron chelators in cardiac iron deposition in hemochromatosis treatment especially Deferriprone (L1) as a treatment modality as it is known to be effective especially in cases of cardiac iron overload
