

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_125046
Title of the Manuscript:	Frequency of Uropathogenic Bacteria in Patients who came for Consultation to the National Reference University Hospital Center of N'Djamena (CHAD)
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The studied subject is interesting and fits the objectives and scope of the JABB Journal. This study is crucial for understanding the prevalence of uropathogenic bacteria in patients seeking care at the National Reference University Hospital Center in N'Djamena, Chad. By identifying the most common pathogens responsible for urinary tract infections (UTIs), this research can help inform local treatment protocols, guide effective antibiotic use, and reduce the risk of antibiotic resistance. Additionally, the findings can contribute to improving patient outcomes and healthcare strategies in the region, while also providing valuable data for future studies on infectious diseases in Chad	
Is the title of the article suitable? (If not please suggest an alternative title)	Frequency of uropathogenic bacteria in patients visiting the national reference university hospital center of N'Djamena (Chad)	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The summary is comprehensive: Results: Of a total of 237 urine samples examined, 121 were positive with an overall frequency of 51% of which men represented 64% and women 36%	
Is the manuscript scientifically, correct? Please write here.	Yes, it is I suggest that the authors to pay attention to the following points: Introduction section: Instead of phrasing statements as questions, please reframe them as the aims or objectives of the study. Material and methods (study materials): Kindly correct APIE 20E to API 20E Material and methods section (Subsections 2.5.1; 2.5.2; 2.5.3; 2.5.4, and 3.1 Distribution of urine samples in the results section) : please cite the relevant figures in the text for these subsections. Discussion and conclusion section: since there are no results for the antibiotic resistance profile, please remove any mention of this in the discussion and conclusion sections.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	I suggest that the authors add the following references -Benyagoub, E.; Benchaib, S.M.; Zaalán, A. and Bendada, F. (2018). Prevalence and isolation of pathogenic strains responsible for some infections in Bechar's community (Southwest of Algeria): About 1458 cases. Bangladesh Journal of Medical Science. 19(3): 404–413. -Benyagoub et al (2013). Identification and study of the emergence of antibiotic resistance of microorganisms responsible for urinary tract infections in Bechar (Algeria).
