Title of the Manuscript:	Tackling Lip Hemangioma In The Elderly With Polidocanol Sclerotherapy – A Case Report And Review.
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	I respect the authors' choice to report this semi-rare case.	
Is the title of the article suitable? (If not please suggest an alternative title)	I believe the authors have overall made a good execution in their title. However, I would suggest adding the phrase "of the literature" at the end of it; "TACKLING LIP HEMANGIOMA IN THE ELDERLY WITH POLIDOCANOL SCLEROTHERAPY – A CASE REPORT AND REVIEW of the literature."	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	In the second line of the abstract "60% to 70% of these tumors..." the authors cannot start their sentence by numerical characters. It must start by "sixty percent" instead. Lines 8 and 9 of the abstract: "Sclerotherapy alone, or in combination has shown promising results.", in combination with what? The authors need to be more precise with their phrasing.	
Is the manuscript scientifically, correct? Please write here.	Yes, the manuscript is scientifically sound.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and related to the topic of the paper.	
Is the language/English quality of the article suitable for scholarly communications?	Yes, the language and English quality of the paper is suitable.	
<u>Optional/General</u> comments	Overall, I find this paper to be a proper report of a case combined with a short yet comprehensive review of the literature.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<u><i>(If yes, Kindly please write down the ethical issues here in details)</i></u>
