

Review Form 3

Journal Name:	South Asian Journal of Social Studies and Economics
Manuscript Number:	Ms_SAJSSSE_128712
Title of the Manuscript:	Challenges and Opportunities for Local Donors in Scaling Rural Water Supply Solutions in Tanzania
Type of the Article	Short Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript brings much contribution to the rural development in Tanzania and elsewhere because it relates to what I did in my study. Therefore, it is going to add much value on the current situation in the rural water supply in Tanzania.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable because it makes a continuation of what has been achieved so far as well as the challenges to the ongoing rural water supply and management. I could suggest the area of study to be more specific since the rural Tanzania is very wide	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive enough and the challenges have been mentioned. I could suggest those opportunities to be clearer and more open as part of the work and the necessary information.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is correct scientifically. I could much suggest the author to briefly give the literature review since it has carried a large part of the manuscript. If the rules are met on the pages, it could be much better to give more details on the findings. I have not seen also the objectives of the study; they should be clearly highlighted at the Introduction.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient but make sure they reflect more studies on the rural domestic water projects and supply. I could recommend my study on the "Economic Efficiency and Effectiveness of Domestic Water Supply at Moshi Rural District" and others	
Is the language/English quality of the article suitable for scholarly communications?	The language is in good quality	
<u>Optional/General</u> comments	Generally, the Manuscript is good. That is needed is to work on the suggestions starting from the Abstract making sure all the necessary information is briefly mentioned with the findings and recommendations
