PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study addresses a critical environmental challenge: soil contamination by heavy metals, particularly copper, which adversely impacts agricultural productivity and ecosystem health. The proposed simulation of soil remediation through the adsorption of copper compounds by zeolite in an inert granular environment provides a practical and cost-effective solution. This research is particularly relevant given the global demand for sustainable soil management practices that align with environmental regulations and agricultural sustainability goals. The application of zeolites as adsorbents offers a promising avenue for mitigating heavy metal pollution, owing to their high adsorption capacity, cost-efficiency, and eco-friendliness.
