Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides a critical analysis of multiple anthropometric failures among Nigerian children under five, utilizing the Composite Index of Anthropometric Failure (CIAF). By examining the interactions between wealth, residence and regional factors, the study highlights significant socioeconomic and geographical disparities in child nutrition. These insights are invaluable for policymakers and public health professionals aiming to design targeted interventions to combat child malnutrition. Additionally, the comprehensive use of CIAF offers a more nuanced understanding of undernutrition, contributing to the broader discourse on child health metrics.
