<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	The rapid development of fundamental science has made it possible to reveal the underlying mechanisms of intracellular signal transduction, cell cycle regulation, and to identify the key factors that determine the intensity of these processes. The post-genomic era has brought mankind to new methodological horizons, allowing us to accumulate massive amounts of knowledge about the molecular biological aspects of carcinogenesis and tumor progression and to reveal the layer of problems that are the main causes of treatment failures in cancer patients. It is now well known that the peculiarities of the nature of tumor disease reserve numerous mechanisms for the survival of malignant cells, including under the influence of drug therapy.
