

Review Form 3

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_128637
Title of the Manuscript:	Community analysis of plant parasitic nematodes around the rhizosphere of vegetable crops in Jorhat district of Assam
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This study is important in that it highlights the nematode species that parasitize vegetable crops in the Jorhat district. Indeed, nematode symptoms and damage are not always known to growers. In the future, control methods could be proposed to growers depending on the type of nematodes present in their fields.	
Is the title of the article suitable? (If not please suggest an alternative title)	No. In the proposed title it's as if we're talking about nematodes around roots, but in the methodology roots were collected and extracted. Analysis of plant-parasitic nematode communities in vegetable crops in Jorhat district of Assam	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive	
Is the manuscript scientifically, correct? Please write here.	The manuscript is correct	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and recent	
Is the language/English quality of the article suitable for scholarly communications?	Is correct	
Optional/General comments	In this study, which administrative blocks are the most and/or least infested with plant-parasitic nematodes? We need to classify the blocks according to the densities of the different species observed before comparing them. In which vegetables did you record the most nematodes? And in which administrative block? How can you explain this?	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
