

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Medical Principles and Clinical Practice
Manuscript Number:	Ms_AJMPCP_127184
Title of the Manuscript:	Anthropometric Analysis of External Ear Shape and Earlobe Attachment Patterns in the Hausa Ethnic Group of Nigeria
Type of Article :	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Firstly, one of my main questions was how the questionnaires were filled. Were the questions answered by the participants themselves, or were trained researchers asking the questions and collecting answers from the participants? I didn't find the answer to this question.</p> <p>Secondly, how the pattern of the earlobe and morphological shapes of the ear was evaluated exactly? Did the authors measure the size of the earlobe using any specific tool? (Direct measurement or imaging technique was used)</p> <p>Also, the questionnaire used for data collection needs to be attached to the manuscript.</p> <p>In addition, in the previous version, I edited some parts of the manuscript and highlighted them so the authors could use them.</p>
