PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The significant and transformative influence of AI on cybersecurity and cyber defense was recognized and discussed by leading global scholars approximately 6 to 7 years ago. Manuscript Ms_AJRCOS_130096 provides a well-organized and meticulously researched review of AI's role in cyber espionage, addressing both "offensive" and "defensive" tactics in state-sponsored campaigns. This manuscript is especially important for members of the scientific community who seek to gain a thorough and reliable understanding of why certain democratic nations, or coalitions such as the European Union, feel persistently vulnerable to hybrid or AI-enhanced cyberattacks.	
Is the title of the article suitable? (If not please suggest an alternative title)	Indeed, the title of the article is highly appropriate. It implies a lasting era: "the age of AI" is here to remain. Therefore, emphasizing the influence of AI on cyber espionage—and even more critically, the advent of quantum computing powered by AI—should be recognized and addressed by everyone involved in national security, financial stability, and economic strategy.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	I find the abstract to be sufficiently thorough.	
Is the manuscript scientifically, correct? Please write here.	Based on my understanding of the issue, the manuscript appears to be scientifically accurate. This area of research is still relatively new, and there are ongoing differences and inconsistencies in the approaches and terminology used by various national agencies, many of which are often classified.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes most of them are recent.	
Is the language/English quality of the article suitable for scholarly communications?	Yes
