#### **Important Policies Regarding Peer Review**

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

**Review Form 3**

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The penetrating and enhancing role of AI in cybersecurity and cyber defence was established and commented on in the open literature by internationally renowned scholars roughly 6 – 7 years ago. Manuscript Ms_AJRCOS_130096 is a professionally systematised and thoroughly researched review of AI's impact on Cyber Espionage, both "offensive" and "defensive", as practised in state-sponsored campaigns. This manuscript is of particular significance to all members of the scientific community who would wish to inform themselves reliably as to why certain democratic states, or indeed groups of states such as the European Union, feel continuously threatened and affected by hybrid or cyber attacks enhanced by AI.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title of the article is quite suitable. It suggests even a perpetuity: "the age of AI" will be here to stay, so highlighting the impact of AI on cyber espionage – not to speak of the graver development, the introduction of quantum computing, enhanced by AI – should be noted and taken care of by all those dealing with national security, financial sobriety and economic strategy.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	I find the Abstract adequately comprehensive.	
Is the manuscript scientifically, correct? Please write here.	To the best of my knowledge and understanding of the issue, the manuscript is scientifically correct. This branch of scientific research is relatively young and there are still differences and discrepancies in the approach and terminology of various national establishments, moreover they are often classified.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	I have rarely seen a more extensive body of scientific references, all of them recent.	
Is the language/English quality of the article suitable for scholarly communications?	The quality of English equals similar articles. It is precise and understandable.	
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
