Important Policies Regarding Peer Review

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The article certainly holds importance as it integrates cognitive psychology with educational techniques and provides some insights to improve vocabulary acquisition. It offers new approach to enhance language learning which needs further investigation in personalised learning experience.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable; however some clarification (use of acronyms SR and SpR) can make it more accessible to wider audience. In my opinion title ' Enhancing Second Language Vocabulary Acquisition through Self-Regulation, Spaced Repetition, and Cognitive Load Management Strategies ' can be more effective.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It is good; however it lacks information about research methodology used for the research. Likewise, information about participants as well as brief mention of findings and analysis are also lacking.	
Is the manuscript scientifically, correct? Please write here.	Manuscript should logically organised and giving citations in discussion and analysis can be avoided.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are more than enough and some of them are redundant.	

Review Form 3

<p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Language is good but lacks research approach.</p>	
<p>Optional/General comments</p>	<ol style="list-style-type: none"> 1. Introduction is good and leads to the need the present research. 2. Section of literature review is too long and needs to be arranged systematically and should end underscoring the research gap. 3. The section of research methodology lacks following information <ol style="list-style-type: none"> A. Background information of participants such as age, gender, number of participants, educational background and data collection method. B. The place of the research is not mentioned. 4. Findings and analysis should be specifically discussed for interviews and coding and organising..... 5. Strategies can be discussed separately as there is no need to club it with findings and analysis. 	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i></p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
