

Editor's Comment:

I reviewed the manuscript on "Effect of soaking and germination on the functional properties of Kpaakpa (*Hildegardia barteri*) seed flour using response surface methodology". After the evaluation it can be observed that the manuscript is not suitable to publish in current form therefore, major revision is required before publishing.

- Manuscript language need improvement
- Sample collection instead of sample sourcing
- Methodology should be explained parameter wise
- Quality of figures is poor, need improvement
- Authors need to use SI units throughout manuscript
- Authors cited very old references; these references could be replaced with newer one.
