

Editor's Comment:

Scanning through the entire revised manuscript, I noted that the authors have attempted to correct the paper according to the suggestions from the two reviewers. However, they have not done a thorough job. As such, I want to add the following comments to better the quality of this paper:

1. All keyword selections duplicate the same as in the paper title. Other selections must be re-chosen.
2. Charts 1 and 2 should be renamed as Tables 1 and 2. Therefore, the original Table 1 will be named Table 3.
3. There are two sets of headings for the original Table 1. Why?
4. The conclusion section is too brief and does not include all the significant findings from this study.
5. The reference list has not been alphabetically ordered.

Should the authors be willing to modify the revised manuscript according to the above-mentioned comments, **this paper is acceptable for publication.**
