

### **Editor's Comment:**

Scanning through the entire article, the following corrections are recommended:

1. Some keywords duplicate the same as in the paper title. Other selections should be re-chosen.
2. Citation such as "(Kirsten and Sartorius, 2002 & Mylene et al., 2002)" should be changed to "(Kirsten and Sartorius, 2002; Mylene et al., 2002)".
3. Who is "YV Alag"? This reference should be added to the reference list.
4. Please use "and" instead of "&" throughout the entire text (including the reference list).
5. Figure caption should be at the bottom of the figure, not above.
6. Should use metric unit for "acres".
7. What is "Gol" in reference list no. 3?
8. Format for the reference list must conform to the requirement of the Journal. In fact, use only one uniform format. Avoid using full first names of the authors, just the initials are sufficient.
9. A thorough proof-check (punctuation) and English check may be necessary.

If the authors are willing to revise the manuscript according to the above mentioned, **this article is readied for publication acceptance.**
