

Editor's Comment:

Scanning through the revised manuscript, I noticed that the authors have responded adequately to all the comments and suggestions provided by both reviewers. The paper is now acceptable for publication acceptance. However, to better the quality of the final quality of this paper, I have two minor suggestions:

1. Some of the keywords duplicate the same as in the paper title. Other selections need to be re-chosen.
2. All equations must be numbered, even there is only one.
