

### **Editor's Comment:**

The revised manuscript is much improved than the original manuscript. Authors have done a good job in revising according to most of the reviewers' comments. However, the following corrections may further enhance the quality of this paper:

1. The ascending order for the keywords is not important. But, a few keywords duplicate the same as in the paper title. Other selections should be re-chosen.
2. Please use "and" instead of "&" throughout the entire text.
3. There is only one up-to-date (2021) cited reference. If recent references are not that easy to found, which is sometimes understandable, authors should include a few statements to emphasize the reasoning for this discrepancy in the text.

Should the above-mentioned minor corrections be properly addressed, **this manuscript is readied for publication acceptance.**
