

Editor's Comment:

The said paper has lots of serious flaws even in the revised version. The authors are strongly advised to correct all **the flaws prior to publication acceptance consideration**:

1. Add country name to the paper title.
2. What is "cum" in the first sentence in the abstract?
3. Two keyword duplicate the same as I the paper title. Other selections must be re-chosen,
4. Too many English language and capitalization errors have been detected. Please rewrite the entire paper in correct English.
5. Many spelling errors have also been noticed, such as "od" in the methodology section.
6. Use "and" instead of "&" throughout the entire text.
7. Units used for area and size must be included in the table headings in Table 1. Similarly with some of the items (size, area) in the first column of Table 2.
8. The most serious flaw for this paper is not one of the references listed have been cited in the text. The references are necessary and important to reinforce result findings and support arguments put forth in this study.
9. The reference listing must be alphabetically ordered by the last name of the first author.
