

Editor's Comment:

Whiling going through the manuscript I have observed following points

1. There are many grammatical mistakes in the manuscript.

I have corrected some of them in first three pages (see the attached file).

2. It should be reviewed by good reviewer who can really review it while justifying his duty.

3. The language of the ms should be crisp and concise. The author has used long and details explanations without much significance

Last if possible send it again to a good reviewer for detailed review, if you don't have emergency in publishing it.
