

Editor's Comment:

The subject of the review is of practical interest and the manuscript is informative in this respect.

Yet, a too limited part of the main suggestions of the Reviewers have been considered; in particular the Discussion section does not show any substantial improvement and the Conclusion section is still lacking in the revised version of the manuscript.

I thus invite the Authors to take these points into consideration in a further version of revision of the manuscript, with the improvements being clearly underlined in yellow, as explicitly required.

This is mandatory before the manuscript could be accepted for publication in AJRAVS.
