

Editor's Comment:

Scrutinizing the revised V1 manuscript, I am of the view that the authors did not attend to concerns raised by reviewer " Kof " adequately. The following are key comments which should still be attended to in respective sections:

□ **INTRODUCTION**

- The problem is not posed
- The choice of species is not justified
- The objective of the work is not defined

□ **CONCLUSION** In the conclusion, we present the main results and we show the contribution of the study to the scientific world. (Let the conclusion be self-explanatory. E.g which data is mentioned in the conclusion.)
