

Editor's Comment:

The reviewed manuscript (2021/ARRB/65521) entitled, "**Occupational and Environmental Health Concerns of Unsafe Acts and Conditions in Selected Poultry Production Sites in Ido/Osi Ekiti State**" to me for a final decision. Indeed, I have gone through the paper and found that the authors have followed the majority of comments raised by the reviewers but they did not fully improve the language according to the reviewer's instruction. This has been evidenced, while, I was checking the revised manuscript and found that there are still some places, where the English languages are not grammatically correct. In addition, the whole manuscript (including tables and references) should need to be fully formatted according to the journal. The abstract is extraordinarily large and needs to be shortened within 300 words by reducing the unnecessary introductory statements, detailed methodologies and elaborated results. Therefore, I recommend the paper for publication with its revised title (**Occupational and Environmental Health Concerns of Unsafe Acts and Conditions in Some Selected Poultry Production Sites in the Ido/Osi Ekiti State, Nigeria**), pending the above-mentioned revisions.
