

Editor's Comment:

Based on two expert reviewer comments, I think this manuscript could be suitable for publication in ARRB.

I have just one comment, still, there are some grammatical errors in the revised manuscript, authors are advised to carefully check grammatical mistakes again before publishing.

1. Month name should be capitalized (Abstract: August 2019)
2. Check the grammar of this sentence "Moreover, it was declared only in 2 farms out of the 5 selected. from 2019 to 2020, the status of resistance has shifted from suspicion to resistance for ivermectin and from absence of resistance to suspicion to albendazole."
3. Dug name albendazole should be uniform in manuscript, either Albendazole or albendazole .
