

Editor's Comment:

I agree with the reviewers when saying that the writing is very poor and confusing (e.g., in the conclusion: "Various measures to be built to avoid or minimize traffic congestion are building more use of existing ring roads"; "Heavy legal/ financial penalties for rule violators, the police should be honest and loyal to maintaining the traffic flow, speed limit display, and Installing CCTV cameras for monitoring and management." (this last sentence does not even have a verb)). As it stands, I'm afraid the manuscript is in no condition to be published.
