

Editor's Comment:

This paper should not be published by the following reasons:

- The lack of the authors' explanations to the reviewers' comments.
- Equation (2) is not obtained from Equation (1).
- Y_t in Eq. (24) is the maize price. The paper is about rice.
- Minor remarks:

(1) The sentence "The period was divided for better understanding by dividing the 34 years into two parts for better understanding the rice performance" is nearly repeated.

(2) About Equation (1), the authors indicated that "a" and "b" "are the parameters to be estimated". However, these parameters are not present in Equation (1).
