

### **Editor's Comment:**

The following suggestions may upgrade the said manuscript to publishable quality:

1. No sub-headings are needed in the abstract.
2. All the keywords have not appropriately selected and should be re-chosen. Each selection may consists of more than one word, not just one word.
3. What is "sem.", "CD" in Table 2? Besides, column heading "50%F" does not match up with the footnote definition name.
4. In the last sentence of section 3.6, "...with the results obtained [13]." Should correct to "...with the results obtained by Jayalakshmi and Praneetha [13].
5. English language is a major flaw with this paper. Should use either past tense or present tense throughout the entire paper.
6. A thorough proof-check is highly recommended also.
